## PROFESSIONAL SUMMARY

Final-year Software Engineering student (**CGPA: 3.00/4.00**) with **20+ live deployed Python applications** built for Pakistan's leading enterprises — Engro, Nestlé, Telenor, Hamdard, Colgate, Akhuwat, and more. Specializing in geospatial supply chain routing, retail telematics dashboards, and operational data pipelines. Proven ability to translate complex logistics and inventory data into secure, real-time web applications that reduce dispatch latency and optimize large-scale FMCG distribution networks.

## TECHNICAL SKILLS

|                          |                                                                                                                               |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| Supply Chain & Retail IT | Geospatial Route Optimization, Decentralized Inventory Reporting, Live ETA Tracking, Cold Chain Analytics, Demand Forecasting |
| Languages & Data Eng.    | Python (Pandas, NumPy, NetworkX), SQL, JavaScript (ES6+), HTML5, CSS3                                                         |
| Frameworks & Arch.       | Streamlit, Custom WebSocket Engines, Folium/Leaflet (Spatial Mapping), NLP/RAG Pipelines                                      |
| Tools & Methods          | Git/GitHub, Agile/Scrum, CI/CD, Rapid Prototyping, WordPress/Elementor, Advanced MS Excel                                     |

## PROFESSIONAL EXPERIENCE

**Pakistan Hindu Council** March 2026 – Present | Karachi, Pakistan  
[Data, Operations & AI Intern](#)

- Architected a secure **NLP/RAG chatbot** in Python enabling staff to query internal operational databases in natural language — eliminating manual document sorting and reducing data retrieval time across decentralized regional hubs.
- Restructured manual data collection pipelines with automated Python workflows, significantly reducing reporting latency and improving data accuracy delivered to executive management.
- Developed custom Python scripts to clean, filter, and aggregate multi-source operational data into structured, executive-ready reporting formats.

**Interns Pakistan** December 2024 – January 2025 | Remote  
[Web Development Intern](#)

- Built responsive digital interfaces using HTML5, CSS3, and JavaScript as part of the Career Accelerator Internship Program; performance rated above expectations. (Certificate ID: IPB5078277)

## KEY PROJECTS (20+ live Streamlit deployments — full portfolio at link above)

**Nestlé Agri-Logistics & Supply Chain Optimizer** [↗ Live App](#)  
Geospatial routing engine mapping milk collection from 1,000+ rural farms to processing facilities. Enforces freshness time-windows, vehicle capacity constraints, and spoilage risk scoring — applicable to regional FMCG retail distribution.

**FMCG Telemetry Engine — Industrial Hub Digital Twin** [↗ GitHub](#)  
High-velocity telemetry pipeline using pure Python WebSockets to process real-time operational data simulating FMCG manufacturing lines, monitoring system velocity and capacity thresholds.

**S&P Global CI/CD Pipeline Simulator & Visualizer** [↗ Live App](#)  
Developed an interactive Python-based DevOps dashboard simulating automated Salesforce release stages, static code analysis verification, UAT staging checks, and deployment validation workflows to visually demonstrate enterprise pipeline best practices.

## EDUCATION

**Sindh Agriculture University, Tando Jam** Expected December 2026  
BS in Software Engineering — **CGPA: 3.00 / 4.00**  
**Higher Secondary School Certificate (Pre-Medical)** 2022  
Score: **94.18%**

## CERTIFICATIONS & ACHIEVEMENTS

- IBM** — Introduction to Software Engineering Professional Certificate (*Coursera, 2025*) [\[Verify\]](#)
- DeepLearning.AI** — AI For Everyone, taught by Andrew Ng (*Coursera, 2025*) [\[Verify\]](#)
- World Bank Group** — Sustainable MSME Finance (2025)
- Digital Skills Pakistan** — Kamyab Freelancer Program (KFP) (2025)

- **Great Future Pakistan** — 🏆 **National Talent Award**, Great Future Talent Olympiad Batch VI (*December 2025*)
- **SAU Tando Jam STEP** — Certificate of Achievement, Web Development Training Program (*2024*)
